

FLEXIBLE CONTAINMENT TANKS

For heavy vehicles

BCAM Range

BCAM1 : manual erection of side walls
BCAM2 : opening and closing of the walls by the passage of vehicles

Use

Recovery of accidental oil or fuel leaks from parked heavy vehicles or during maintenance work.
 All kinds of vehicles (tankers, fork lift trucks, tractors...)
 Very quick erection.
 Can be kept in a specifically designed bag for storage or transport.

Design

Container in PVC over fabric for better mechanical resistance
 Material specially chosen for its resistance to petroleum products and most chemicals.
 High frequency welded container.
 Container stretched over metallic stays which are easily assembled and dismantled.

- Optional :
- ☒ Soil cover to protect the tank from roughness of the ground;
 - ☒ Track mats : placed inside the tank they will extend the life of the tank when there are frequent vehicle movements;
 - ☒ **FILTRELEC**[®]: filtering system fitted to the tank drain valve and which allows rain water to drain out whilst blocking hydrocarbons; (additional documentation on request)
 - ☒ Sorbent to clean up hydrocarbons from the surface of the tank;
 - ☒ Storage and transport bag.

Delivery : 5 to 6 week at reception of the order

BCAM Range standard	Dimensions (mm)			Volume	Weight (kg)	
	Length	Width	Height	Litres	BCAM1	BCAM2
	7.925	3.048	305	7.362	60	59
16.459	4.267	305	21.408	130	152	
25.908	4.267	305	33.697	204	218	

There are approximately twenty different sizes; For any other dimensions, please consult us.
