

FLEXIBLE CONTAINMENT BUND FOR HEAVY VEHICLES OR EQUIPMENT STORAGE

Use

Recovery of accidental oil or fuel leaks from parked heavy vehicles, during maintenance and vehicle washing work or equipment storage.
All kinds of vehicles (tankers, fork lift trucks, tractors...) and/or industrial equipment.

Design

Bund made with composite material canvas (TOR or CLASS) specially chosen for its resistance to petroleum products and most chemicals.
High frequency welded canvas to ensure water tightness.
Bund stretched over metallic structure which is easily assembled and dismantled.

Dimensions (All lengths are available by step of 1m)			
Width (m)	Length (m)	Height (m) (clear height 0,3m)	Volume (L)
2	From 2 to 26	0,35	From 1200 to 15600
3	From 2 to 26	0,35	From 1800 to 23400
3,5	From 2 to 26	0,35	From 2100 to 27300
4	From 2 to 26	0,35	From 2400 to 31200
4,5	From 2 to 26	0,35	From 2700 to 35100
5	From 2 to 26	0,35	From 3000 to 39000

Installation

Very quick assembly of the bund structure with metallic squares to be sled into canvas sleeves.

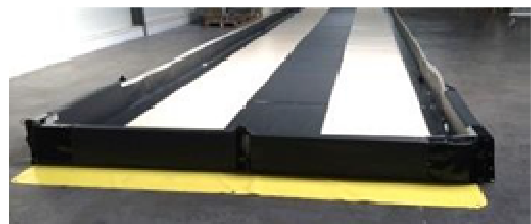

Options

- Ground cover to protect the bottom of the bund from ground roughness
- Rolling track mats: placed inside the bund they will extend lifetime of the bund when vehicle movements are frequent;
- 1 or 2 automatic folding walls for easier vehicle access (avoiding bund dismantling)
- **FILTRELEC®**: filtering system fitted to the bund drain valve which allows rain water to drain out whilst blocking hydrocarbons (additional documentation on request)
- Storage and transport bag.
