

TEMPORARY STORAGE BUNDS BSTUB / BCAM

Storage of electrical material
and environmental
protection of
heavy duty
vehicles

AKHELEC
GMT.International

Minimise the risk of pollution during site work

BSTUB: temporary storage of oil immersed electrical transformers

BCAM: environmental protection of heavy duty vehicles, mobile transformers...

Key Features

Easy and quick to deploy

Light and robust frame structure

Envelope:

Oil resistant

Crush resistant

UV resistant

REACH compliant

2 types of envelopes to better accommodate to your project constraints

Continuous rainwater filtration and draining

BCAM: a field proven solution to prevent pollution from mobile transformers

Service

Pre-sales: recommendations, seek appropriate technical and economical solutions, on-site measurements.

Study: tailor-made design and load distribution based on the soil quality. Filtration system design accounting for local extreme weather conditions.

Manufacturing: systematic quality control.

On-site installation supervision: experienced staff security and specific clearance.

External Certifications

Rainwater filtration:

TÜV N° 73068874 TPI 001

SGS N° RES 142458 Rev1

Oil resistant certificate provided by the specific envelope manufacturer
