

FILTRELEC®

PORTABLE SOLUTION F50

Filtration of water polluted
with hydrocarbons

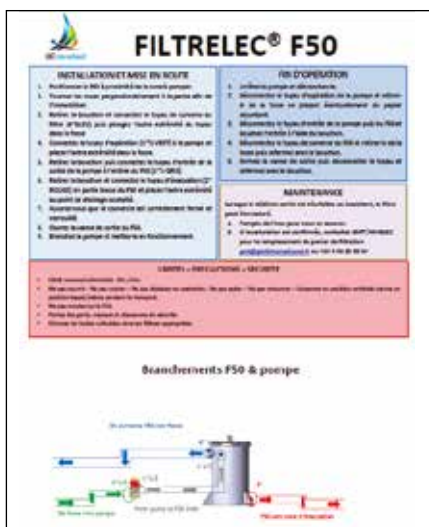

**Full compliance with Clean Water Act,
REACH and RoHS requirements.**

FILTRELEC® F50 is a technical and economical field proven alternative to traditional polluted water management.

Operator oriented product

User guide displayed on the product

Quick couplers

Nozzle plugs for transportation

Handling by a single operator

Key features

Fulfil Clean Water Act requirements: HC<5 mg/l

Minimise depollution costs

Facilitate depollution operations:

- Handled by a single operator
- Transportable in a light-duty vehicle
- Quick on site set up
(quick couplers, simplified user manual)

Minimise on-site work for permanent installation:

- Minimise installation costs
- Minimise land surface required for rainwater treatment
- Minimise excavation and civil work
- Speed up the site work deployment
- Minimise operation and maintenance costs

Options

Oil presence and fluid level detection to automatically drive the pump (required for autonomous or permanent installation)

Solution integration on a light trailer for mobile operations or on skid for permanent installations.

Service

Design: our experienced staff can offer recommendations to come up with the appropriate technical and economical solution based on the customer requirement.

Manufacturing: systematic quality control.

On-site depollution: filtration and drainage of the aqueous phase; concentration of the ultimate waste (oil).

Maintenance

The absorbing media is encapsulated inside a tool-less replaceable housing.
